

The goal of the submitted thesis: “Architecture at Pistiros and 3D reconstruction” is to analyze whole unit of preserved architecture at ancient site at Pistiros. The first part is concentrated on describing the geographical and historical background at Thrace during the existence of emporion at Pistiros at 5th-3rd centuries BC. In the second part I characterize site at Pistiros with its geography and history. The third part is concentrated on describing architecture preserved on the site up to present day. In the fourth part I try to find relations in the wide area of ancient Greek and Thracian world. Subject of last part is 3D visualization of preserved architecture at Pistiros.
